

Start date: October 1, 2019 (third round)

Opportunities

- Cooperation with excellent junior and senior researchers in a motivating environment
- Further establishment of an international interdisciplinary educational research network of researchers working at Leibniz Institutes and universities throughout Europe
- An outstanding setting for developing new and innovative research ideas in the field of interdisciplinary educational research
- Opportunity to set up, and funding for, collaborative research projects together with fellows from other disciplines within the College (so-called “micro groups” – e.g. funding for English language copy editing for project related journal articles, funding for required data, student assistants, travel costs)
- Bi-annual interdisciplinary research workshops for its fellows and participating senior researchers including methodological and professional development components
- Mentoring by seniors from the participating research institutes or CIDER alumni
- Public Science activities awards (2021 and 2022).

Expectations

- Continuous and active participation in College activities and workshops
- Collaboration in (at least) one Micro Group on a College research topic
- Publication of scientific articles on College research topics
- Two transfer- and public science publications and activities during the fellowship
